

GLASS TUBING

Frazier-Simplex, Inc. is able to offer a turnkey production facility for glass tubing from batch charging to tube packing. This equipment has been used by most large tubing manufacturers in the USA for years. The critical motions of each piece of equipment are servo motor controlled for improved accuracy and enables the user to make changes during production. The following equipment can be added downstream of our furnace and forehearth systems or added to an existing facility for equipment upgrades.

- ❖ Mandrel/bell positioner
- ❖ Vacuum and/or cooling boxes
- ❖ Catenary and drawline
- ❖ Diameter/wall control
- ❖ Puller/cutter/thunker
- ❖ Cutter/glazer
- ❖ Vision Inspection

End Quality Inspection

- ❖ Broken Ends
- ❖ Cracks
- ❖ Visual Collar Defects
